AN EFFECTIVE, INNOVATIVE SOLUTION FOR LEAK
DETECTION IN LARGE DIAMETER WATER PIPELINES

www.sistemanautilus.es

Nautilus System

Wireless, interior, neutrally buoyant technology for water leak detection in big diameter pipelines

LEAK DETECTION

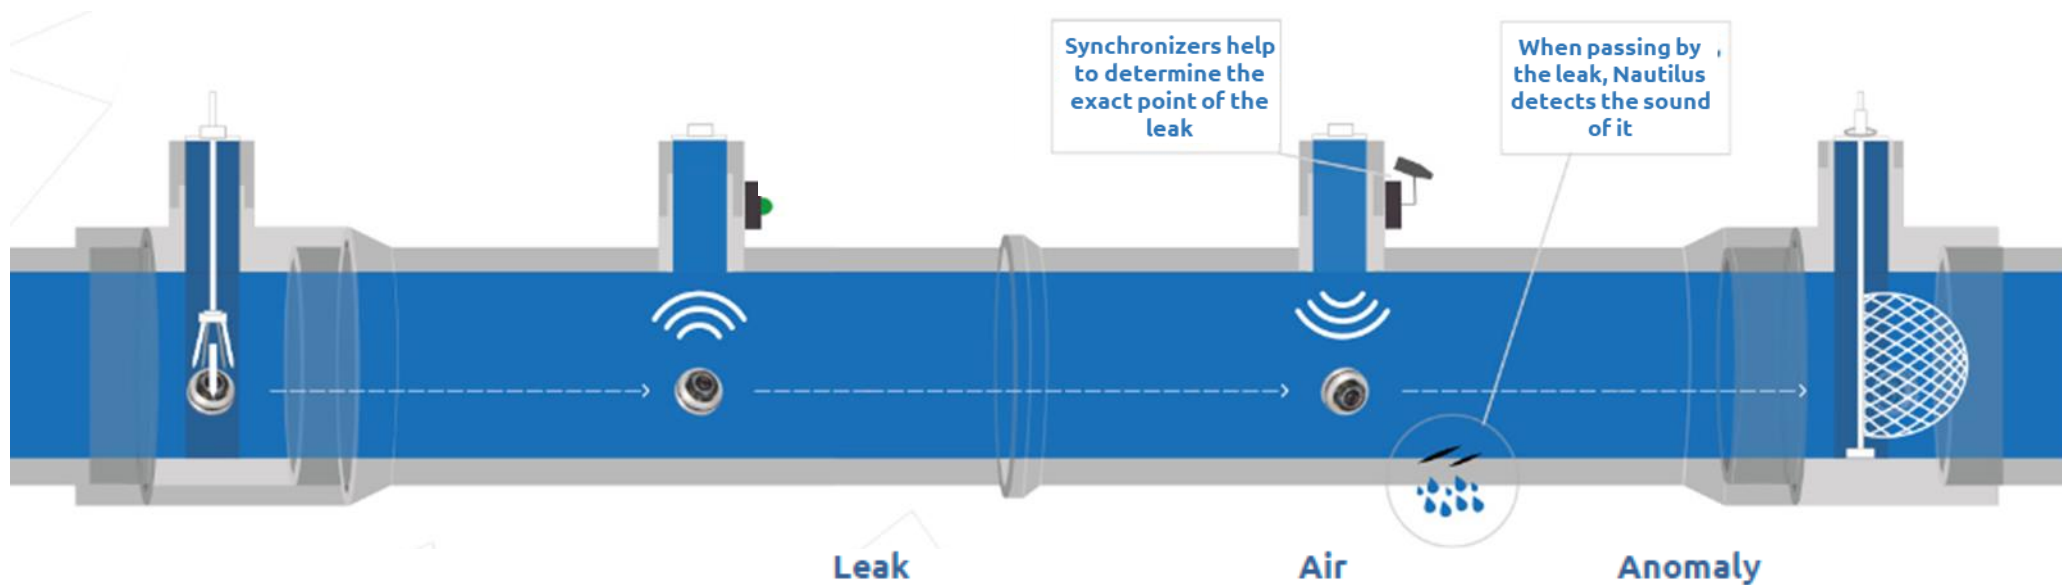

informs on the exact location of a leak when the water company has noticed an increase in consumption.

NETWORK INSPECTION

to know the actual state of the pipeline, giving important information during the decision making process on pipe renewal.

LEAK PREVENTION

periodic reviews in pipeline networks give information on the evolution of a leak, this allows to take preventive decisions.

Incident level

Detecting & locating water leaks

- Error margin: less than 1 meter
- Discovers leaks from 0,005 liters per second
- Inspects up to 35 kilometers in one insertion
- Can be used in any type of pipeline materials
- Flows freely in the center of the pipeline
- Can travel vertically
- Inspects sections of pipes with no access
- Can navigate at a very low water speed
- Nautilus has a simple and robust design
- Most affordable large diameter leak detection method on the market
